Interiors

Exteriors

Raw wood: Sand the surface with sandpaper, grit 150-180; vacuum the dust, degrease if necessary. On the exterior wood apply Borma Shield primer, code 3630.

Painted wood: Remove dust and grease from the surface. If old paint is flaking, preliminary sanding is recommended (150-180 grit sandpaper). Metal: If present, remove rust with sandpaper or abrasive brush and proceed with the application of Waterbased Antirust Undercoat NAT6915XX. Plastic, galvanized sheet metal, glass, ceramic: Lightly sand with 180-240 grit sandpaper, vacuum, degrease and clean. Consider applying Anchoring Undercoat for Difficult Substrates, 6971.

Spread the product on the surface with a brush, spray or roller.

Leave to dry for 4-24 hours.

Apply a second coat to achieve high coverage and uniformity.

Wait 48 hours for complete drying.
